

STAGES STREET CAR ACCIDENTS FOR MOVIES TO HELP SAFETY FIRST CAMPAIGN

Lottie Forbes.

Miss Lottie Forbes, 19-year-old school teacher, has gone through all kinds of accidents by street cars in St. Louis before a movie camera so the public may see the dangers of careless walking and riding.

GIRAFFES

The giraffe is a high, narrow animal found in circuses and delirium tremens.

It has a ten-story neck and no use for it. We often wonder why is a giraffe's neck, anyhow. The giraffe probably wonders, too. It's so long the poor thing could choke to death at one end and never know it at the other. And it keeps his head so far from the ground that every time he looks down he's afraid he'll fall off.

But let's not hold the giraffe too strictly to account for his neck.

He probably started out to be a boa constrictor and forgot about it.

The only person that ever envied a giraffe was a small boy on the wrong side of the fence at a ball game.
